

## RELEASE NOTES

Version 6.1 | March 2017

**UFED TOUCH2, UFED TOUCH, UFED 4PC,  
UFED INFIELD, UFED PHYSICAL ANALYZER,  
UFED LOGICAL ANALYZER, UFED READER**

### HIGHLIGHTS

#### DEVICE SUPPORT

- The fastest physical extraction (Advanced ADB) method in the industry for thousands of Android devices.
  - You can now perform physical extractions directly from the mobile device to any USB storage device (USB 3.0 recommended) or to an SD Card for any device with an SD card slot.
  - Generally, this capability works on devices with a security patch level up to November 2016. Due to the widely fragmented variety of Android devices, exceptions may apply.
  - Unmatched data extraction speed and simplicity.
  - To perform this extraction using an external USB storage device, you will need cables OTG 501 and 508. To register for the new extraction cables, as well as future ones, please [click here](#).

	Device with SD Card	Device without SD Card
Device with Micro-USB Connector	Can be extracted using SD Card or using cable 501	Can be extracted using cable 501
Device with Type-C Connector	Can be extracted using SD Card or using cable 508	Can be extracted using cable 508

- Physical decoding support is now available for the 4 Alcatel devices running Spreadtrum chipset (SC6531) that was introduced in UFED 6.0 – Alcatel 1016G One Touch, 1016D One Touch, 3022G One Touch and 2040D One Touch. Supported data types: SMS, call logs, contacts and calendar.

#### APPS SUPPORT

- 209 updated application versions.

#### FUNCTIONALITY

- UFED's new look
- Discover our Advanced Investigative Services

### WATCH ADVANCED ADB IN ACTION!

**Watch video now!** <https://player.vimeo.com/video/207027555>

### NEW PHYSICAL EXTRACTION METHOD FOR THOUSANDS OF ANDROID DEVICES!

*Dramatically reduce your time to evidence with next generation physical extraction technology, **Advanced ADB**, for selected and the newest, Android devices.*

This ground-breaking capability allows Cellebrite customers to perform decrypted physical extraction, via a unique temporary rooting method, which in many cases was not possible, until today!

This version supports 113 tested and approved Android devices. However, this capability should be supported on many other devices. If a specific device is not supported, we recommend that you use a similar model or any generic Android profile.

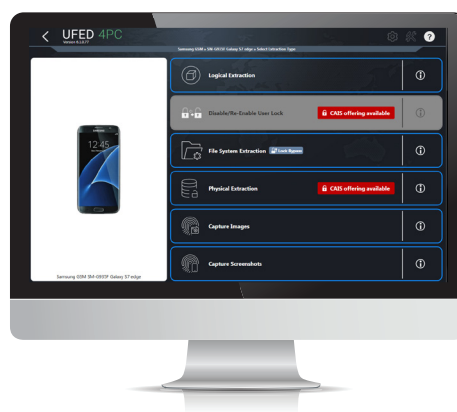

## FORENSIC DEVICE PROFILES

	v.6.1	Total
Logical extraction	119	9,215
Physical extraction*	200	5,028
File system extraction	73	5,035
Extract/disable user lock	7	2,495
<b>Total</b>	<b>399</b>	<b>21,773</b>

The number of unique mobile devices with passcode capabilities is **4,103** \*Including GPS devices

To learn more about CAIS, please visit: [www.cellebrite.com/Pages/services](http://www.cellebrite.com/Pages/services) or [go.cellebrite.com/cais\\_unlock](http://go.cellebrite.com/cais_unlock)

## FUNCTIONALITY

### UFED'S NEW LOOK

We have launched a new and user friendly interface for UFED Touch2, UFED Touch and UFED 4PC.

We have redesigned the user interface by exposing all the functions in a clearer and intuitive way, with a more modern look and feel for a greater user experience.

The new interface has given the UFED platforms a much more appealing and sleeker look, making each function easily accessible and intuitive.

But that's not all. We also refreshed the brand with new iconography that we're excited to share with you!

### DISCOVER OUR ADVANCED INVESTIGATIVE SERVICES

Working on an important case and stuck at a certain point with a mobile device? UFED 6.1 provides you with a solution and will notify you if advanced forensic capabilities via our CAIS service are available for a growing range of supported Android and iOS devices.

CAIS's world-unique capabilities include device unlocking (passcode revealing), lock-bypassing physical and file system extractions, successfully overcoming the latest encryption challenges, and much more.

CAIS complements your existing mobile forensic skillsets and Cellebrite's UFED Series by extending evidence access to mobile devices; accelerating your toughest investigations!

### ADVANCED LOGICAL FOR APPLE DEVICE DEVICES (10.2 AND ABOVE)

Advanced logical extraction for Apple devices running iOS 10.2 and above is now supported. Supported data types: Locations, file system and data files.

### HOW DO I RECEIVE CABLES 501 & 508?

### The new Advanced ADB physical extraction method requires dedicated cables:

- **Cable No. 501 OTG** – enables physical (ADB) extraction for many Android devices with micro USB connectivity. This cable has been part of Cellebrite's cable kit since May 2015. If you haven't received it yet, it is probably because your shipping address is not up to date.
- **Cable No. 508 OTG** – enables physical (ADB) extraction for the newest Android devices with USB Type C connectivity. This cable is a new addition to Cellebrite's cable kit.

### To receive the cables, please follow the instructions below:

- Update or approve your shipping address in <https://cellevault-mng.cellebrite.com/userModify?newCableCampaign=true&cable=501,508>
- Register your UFED device/dongle (if not already registered)
- If you have more than one UFED license, please make sure they are all listed under your account in My.Cellebrite and you will receive both cables per any UFED license
- The cables will be shipped to users with a valid license, to the updated address in My.Cellebrite - **free of charge**

## SOLVED ISSUES

### The following issues have been resolved:

- Fail to perform physical extraction for Samsung GT-E1200 and GT-E1200i devices via UFED InField Kiosk platform.
- Several issues related to identifying the UFED Camera in UFED platforms.
- Tagged messages in UFED Reader may disappear after saving session (.pas) file.
- Selecting chat and messages items in the Timeline View and unable to see the selected items in the chat's model.
- Partial decoding of call logs for iPhone 4 A1332 device, as part of physical extraction.
- Partial decoding of emails for Samsung Galaxy S6 SM-G920F device.

## KNOWN ISSUES

- Image tags indication - When opening saved session from a previous UFED Physical Analyzer version, some tags may not be included.

### GET YOUR VOICE HEARD TO WIN ONE DEVICE UNLOCK

Cellebrite strives to provide you with advanced features and capabilities that meet your expectations, needs and requirements. As a valuable Cellebrite customer, we want to hear from you!

Take a few minutes to answer a short survey which will help us understand how UFED Physical Analyzer helps you with your investigations and examinations, and we will automatically enter your details into a raffle where we're giving away 10 free unlocks via our CAIS service\*.

[>> Take Our Survey](#)

#### Thanks in advance for your time and effort.

\*For a chance to win one device unlock, please provide your details at the start of the survey. One unlock per winner. Winners will be chosen at random.

#### This survey is also available in the following languages:

## CRYPTOGRAPHIC HASH VALUES INFORMATION

You can validate the integrity of Cellebrite's UFED software files by verifying their cryptographic hash values. This can help you identify whether a file has been changed from its original state.

Product	MD5	SHA256 (RECOMMENDED)
