

Touch2 Ruggedized

Overview

Portable, fast, and built to withstand the toughest conditions, the Touch2 Ruggedized features the latest extraction capabilities of the Touch2 in a sturdier silicone case with an embedded camera, GPS and stronger WiFi. Equip your examiners and investigators with the Touch2 Ruggedized to extract device data in the most demanding lab or field environments.

The Touch2 Ruggedized is available with UFED Ultimate software and comes with a forensic accessory kit, designed to support your investigation. View call logs, images, videos and other key logical data directly from the Touch2 Ruggedized at the point of extraction to quickly assess evidence. Eliminate the risk of cross-contaminating data when you extract it quickly and securely within a closed environment, separate from other applications. With fast computing power, an enhanced battery life and a ready-for-anything tough exterior, the Touch2 Ruggedized lets you reliably extract forensically sound data, no matter where the case takes you.
