

Release Notes

Release Version 7.14: UFED Physical Analyzer, UFED Logical Analyzer & Reader

January 2019

- ◆ Now supporting: 27,141 device profiles
- ◆ App versions: 7,447

HIGHLIGHTS

App support

- First time access to the popular communication app, Zello
- Support for Facebook contacts search on iOS devices
- 129 updated application versions for iOS and Android devices

First time access to popular communication app, Zello

With more than 120 million users worldwide, this new version of UFED Physical Analyzer can decode extracted data from the Zello app from both iOS and Android devices. The data includes: user account details, contact lists, chat logs and location information.

Support for Facebook contacts search on iOS devices

With Facebook app users surpassing the 2 billion mark, and leading the social media arena, we continue to invest our efforts in providing the maximum access to critical data in a user's profile. With this version, we have extended the support to include a list of searched contacts. This data can be recovered when performing a full file system extraction of an iOS device using Cellebrite Advanced Services. For more information visit -> [CAS](#).

New update for the wireless network/BSSID offline database

Download it from MyCellebrite to convert more locations data.

Solved Issues:

- Slow decoding of the Line app for Android devices.
- Tags are lost after loading a .pas file.
- Fail to generate a report due to damaged Device info item.
- Fail to generate a SMS conversion view of similar device owners.
- Fail to select messages in chat conversations.
- A problem playing Viber app audio files for iOS and Android devices.

New iOS & Android app

Application	Type	Decoding Feature
	Messaging/Communication	User account, chats, contacts and locations

Cryptographic Hash Values Information

You can validate the integrity of Cellebrite's UFED software files by verifying their cryptographic hash values. This can help you identify whether a file has been changed from its original state.

Product	MD5	SHA-256 (Recommended)
