

DIGITAL INTELLIGENCE SOLUTIONS GUIDE

OUR CHANGING WORLD

Text message and conversation data are used in 95% of all corporate investigations as a key source of evidence. Extracting this data can be extremely challenging.

MEETING TODAY'S CHALLENGES

The sheer amount of data on computers and mobile devices combined with evolving compliance requirements are the key hurdles that must be overcome. When you then factor in multiple communication methods—texts, calls, e-mails, apps, and social media activity—that must be reviewed during an investigation, it's easy to see how digital intelligence, IT security, and eDiscovery professionals can feel overwhelmed.

There are 2.71 billion smartphone users in the world today.

43% of women and 12% of men claim they have been sexually harassed or bullied at work.

93% of employees use their personal device for work purposes.

69% of mid-size organizations in North America cited data loss when an employee leaves.

Workers spend approximately 30% of the workday using a smartphone.

Text messages and conversations are used in 95% of investigations as an evidence source.

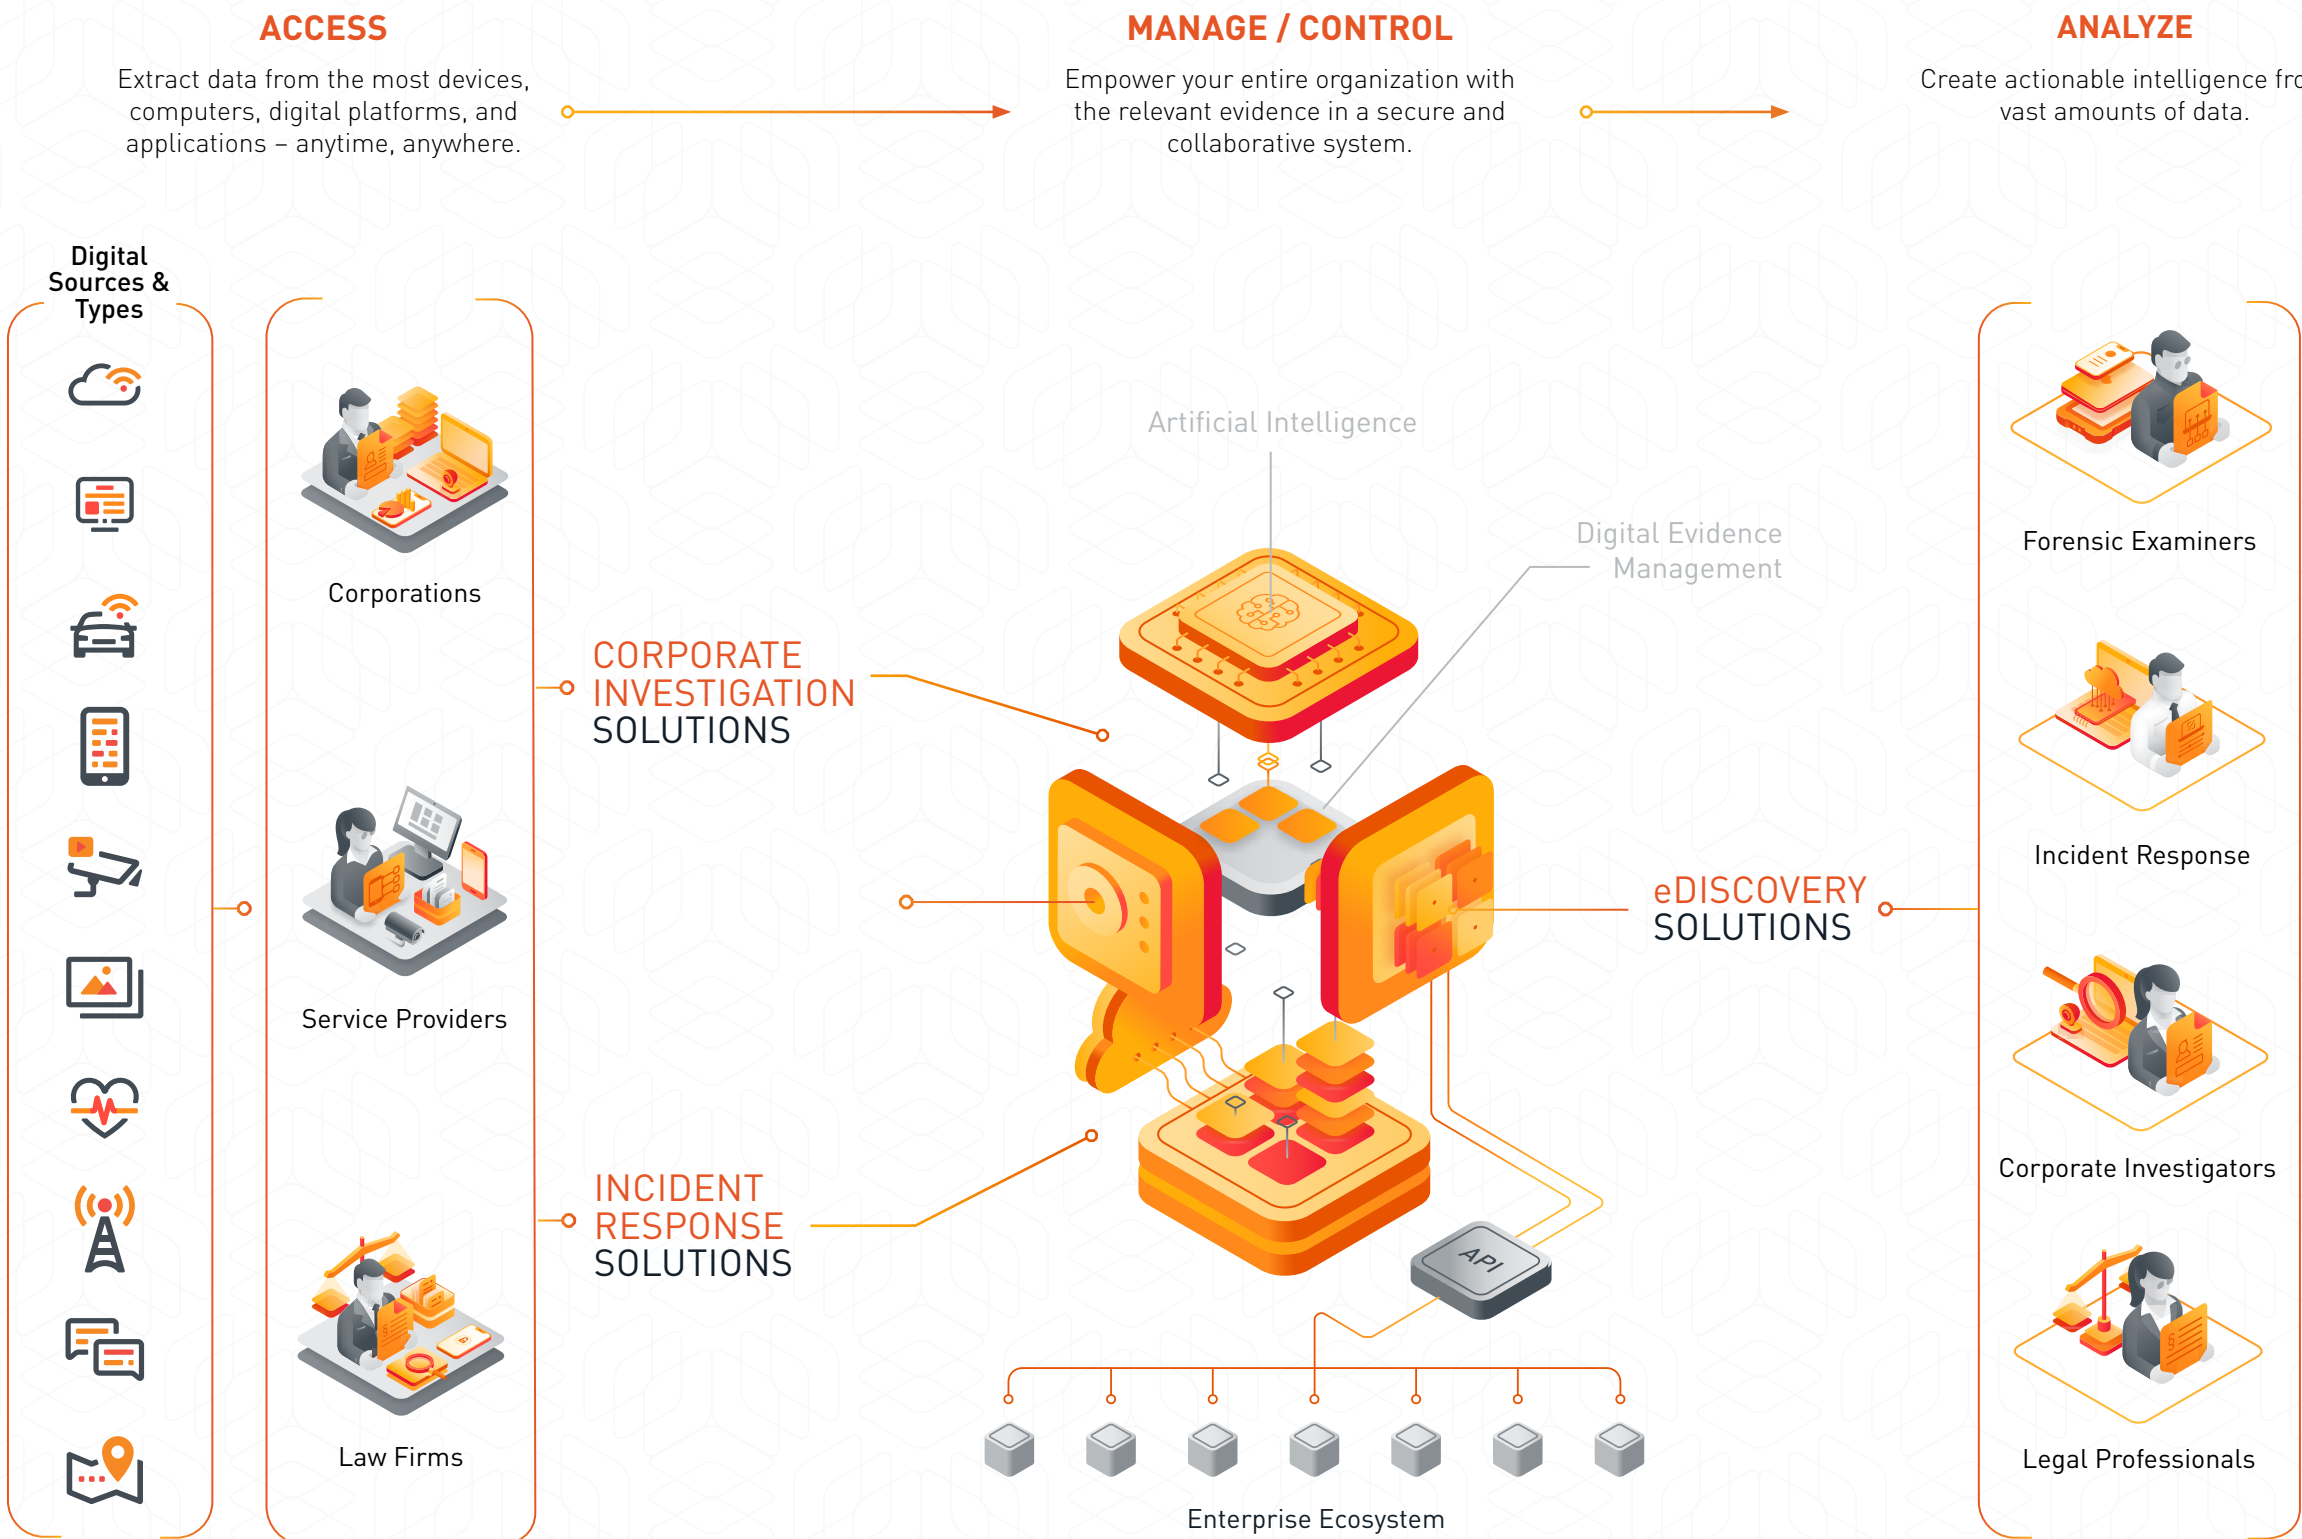

THE CELLEBRITE DI PLATFORM

To meet the demands of our changing world, businesses need to rethink their approach to digital data, how eDiscovery and investigations are conducted, and how digital evidence is shared and used at each stage of the process.

Cellebrite's Digital Intelligence Platform for businesses is an **integrated** set of **solutions** that collectively optimize the activities of all corporate and service provider professionals.

The DI Platform allows businesses, through consent, to lawfully access the most data sources including computer and mobile data, while managing the flow and compliance of the data and evidence. The data can be analyzed and investigated to provide actionable intelligence or directly integrated with the enterprise ecosystem such as review platforms.

CELLEBRITE

CORPORATE INVESTIGATION SOLUTIONS

As our reliance on digital technology grows, employees in all positions, are finding new ways to use technology to commit corporate abuse. This includes fraud, intellectual property theft, cyber and financial crimes, email and Internet misconduct, sexual harassment and discrimination.

To keep their businesses secure, corporations need a solution that allows investigators to identify, collect, preserve, and examine data from multiple digital sources, including computer and mobile, related to inappropriate and illegal activity.

The Challenge

Corporate investigations are becoming increasingly complex:

- Personal and business technology use is blurred
- Workplace communication extends beyond computer use
- Mobile applications that promote collaboration aren't always sanctioned
- Employees don't want to be separated from their devices for extended periods of time

The Solution

Cellebrite's Corporate Investigation Solutions are designed to safeguard businesses to mitigate threats to data security while providing a powerful answer to address all investigation needs, from computers, mobile devices, and the cloud.

- Collect data from multiple device types and profiles
- Build a complete picture to support or refute claims
- Surface specific and actionable evidence
- Manage your corporate investigations toolbox
- Translate textual content in more than 40 languages with Cellebrite Smart Translator

Cellebrite UFED

The industry standard for accessing mobile data.

Cellebrite Seeker

Capture, analyze and report all video evidence.

Cellebrite Physical Analyzer

From encrypted data to actionable intelligence.

Cellebrite Advanced Services

Our experts provide law enforcement agencies with unmatched professional services to overcome encryption mechanisms and complex locks.

Cellebrite Commander

Commanding the authority of tools & processes / Simplify the management of your digital intelligence solution.

Cellebrite Pathfinder

Find the path to insight through the mountains of data.

Cellebrite UFED Cloud

Unlock cloud-based evidence to solve the case sooner.

Cellebrite Macquisition

A powerful, 3-in-1 solution that provides live-data acquisition, targeted-data collection, and digital intelligence imaging.

Cellebrite Training

Participants learn the digital intelligence process and how to perform data extractions and share them with other team members.

Cellebrite Blacklight

Smart, comprehensive analysis of employees' computer systems for locally held documents, communication history, and browser activity.

CELLEBRITE

eDISCOVERY SOLUTIONS

The eDiscovery landscape is becoming more complex. Smartphones are becoming more powerful while networks are providing far greater connectivity. The volume of data and the number of different device types is increasing rapidly. User data that was once stored on devices is moving to the Cloud.

Service providers need a solution that can streamline data collection, including computer and mobile, and reduce processing times with workflows that deliver results quickly to decrease overhead.

The Challenge

The eDiscovery landscape is shifting beyond computer digital intelligence:

- Custodians cannot be separated from their devices for extended periods of time
- Investigators need to access only the most relevant device data
- Data extracted from mobile devices must be integrated into review platforms
- Privacy concerns around the collection of digital data
- Data must be delivered in easy-to-read reports to meet timelines

The Solution

Cellebrite's eDiscovery Solutions increase process efficiencies to support any type of civil litigation by streamlining the collection and processing of data. Review workflows and deliver results quickly to reduce overhead.

- Collect data from multiple device types and profiles including computers
- Review ESI to reduce data and increase relevancy
- Streamline data integration with review platforms
- Manage your eDiscovery toolbox with ease
- Translate textual content in more than 40 languages with Cellebrite Smart Translator

Cellebrite UFED

The industry standard for accessing mobile data.

Cellebrite Physical Analyzer

From encrypted data to actionable intelligence.

Cellebrite Commander

Commanding the authority of tools & processes.

Cellebrite UFED Cloud

Unlock cloud-based evidence to solve the case sooner.

Cellebrite Training

Participants learn the digital intelligence process as well as how to perform data extractions and share findings with other team members.

Cellebrite Advanced Services

Our experts provide law enforcement agencies with unmatched professional services to overcome encryption mechanisms and complex locks.

Legal View

Seamlessly integrate mobile-device data into your existing eDiscovery solution.

Cellebrite Macquisition

A powerful, 3-in-1 solution that provides live-data acquisition, targeted-data collection, and digital intelligence imaging.

Cellebrite Blacklight

Smart, comprehensive analysis of employees' computer systems for locally held documents, communication history, and browser activity.

CELLEBRITE INCIDENT RESPONSE SOLUTIONS

Businesses are exposed now more than ever to cyber and security threats. These can be initiated by external hackers or internal employees. Businesses should focus and respond to real-time threats and incidents.

The variety of devices connected to the business network exposes multiple attack vectors. Malicious activity can be initiated from any of the endpoints the employee interacts with inside your network, from a laptop to a company-issued mobile device.

Businesses need a solution to efficiently and proactively handle cyber and data exfiltration incidents.

The Challenge

Detection and response are becoming more fundamental to cyber security threats:

- Gain access to relevant computer, mobile and cloud data
- Quickly understand the impact of the attack
- Minimize the response time
- Analyze information from multiple sources (mobile, computer, network logs)

The Solution

Cellebrite Incident Response Solutions allow cyber and information security teams to proactively detect and respond in a timely manner.

- Gain access to the relevant mobile and computer data needed for analyzing a breach
- Initiate mobile malware detection
- Conduct root cause analysis using multiple sources of information
- Triage capabilities to identify compromised systems and analysis of system logs and memory

Your Trusted Advisor

Organizations need a trusted partner that can provide the right guidance, tools, training, and support to make them DI ready.

Here's why partnering with Cellebrite makes sense...

Experience: Cellebrite has been the global leader in digital intelligence technology for more than 20 years.

Products: Our best-in-class products can extend the power of your existing resources.

Support: We stand beside you every step of the way. Our experts get your teams up and running quickly to discover the truth faster.

Cellebrite can help create the right digital intelligence strategy for your team.

We Are Where You Are

Cellebrite is never far away. Our Advanced Services team is always ready to assist on your most challenging investigations.

As the global leader in digital intelligence solutions and trusted advisor to customers in over 150 countries, Cellebrite is the premiere provider for law enforcement, military, intelligence, and the private sector. Cellebrite offers the most complete, industry-proven range of solutions for the extraction, decoding, analysis, and collaboration of digital data.

Cellebrite's Digital Intelligence Platform is an integrated solution that offers unparalleled access to the largest assortment of digital devices and cloud data, and analysis solutions that minimize the need for manual review of digital data. The result is actionable intelligence that reduces the time needed to make the right decision.
